**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-18, drawn to a wrapping machine for wrapping a plastic foil web around an object to be packaged, classified in class 53, subclass 428.
  - II. Claims 19-25, drawn to a method of storing and/or transporting a wrapping machine, classified in class 414.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as the machine is reduced to a low size for packaging, by detaching the upper column part from the lower column part of the vertical columns, the machine is transported and/or stored in the low packaged size, and at the place of use, the upper column parts are secured to the lower column parts to install the machine from the packaged size to a full working size.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Benjamin Hauptman on 12/20/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
